Net income available to common stockholders of \$19.3 million for the first quarter, or \$0.32 per diluted share.

Funds from Operations ("FFO") per diluted share increased 8% year-over-year for the first quarter to \$0.71 per diluted share.

Increased 2024 FFO per diluted share guidance to a range of \$2.24 to \$2.34 with a midpoint of \$2.29, a 1% increase over prior guidance.

SAN DIEGO, California - 4/30/2024 - American Assets Trust, Inc. (NYSE: AAT) (the "company") today reported financial results for its first quarter ended March 31, 2024.

First Quarter Highlights

- Net income available to common stockholders of \$19.3 million for the first quarter, or \$0.32 per diluted share.
- FFO increased 8% year-over-year to \$0.71 per diluted share for the first quarter.
- Same-store cash Net Operating Income ("NOI") increased 1.5% year-over-year for the first quarter. However, excluding a write-off of \$0.5 million in the first quarter for non-recurring costs incurred in prior periods relating to construction in progress for then-prospective construction within our retail segment, same-store cash NOI increased 2.3% year-over-year for the first quarter.
- Increased 2024 FFO per diluted share guidance to a range of \$2.24 to \$2.34 with a midpoint of \$2.29, a 1% increase over the initial 2024 guidance midpoint of \$2.26.
- Leased approximately 80,000 comparable office square feet at an average straight-line basis and cash-basis contractual rent increase of 11% and 8%, respectively, during the first quarter.

Financial Results

(Unaudited, amounts in thousands, except per share data)

	Three Months Ended March 31	
	2024	2023
Net income attributable to American Assets Trust, Inc. stockholders	\$ 19,260	\$ 16,136
Basic and diluted income attributable to common stockholders per share	\$ 0.32	\$ 0.27
FFO attributable to common stock and common units	\$ 54,648	\$ 50,380
FFO per diluted share and unit	\$ 0.71	\$ 0.66

Net income attributable to common stockholders increased \$3.1 million for the three months ended March 31, 2024 compared to the same period in 2023, primarily due to (i) a \$10 million settlement payment received during the first quarter relating to building specifications for one of the existing buildings at our office project in University Town Center (San Diego) and (ii) a \$0.7 million net increase in our office segment primarily due to higher annualized base rents at Torrey Reserve Campus and Solana Crossing, a one-time tax refund at First & Main and lease settlement fees received at Torrey Reserve Campus. These increases were offset by (i) a \$6.3 million net settlement payment received on January 3, 2023 related to certain building systems at our Hassalo on Eighth property, (ii) \$0.5 million in non-recurring costs incurred in prior periods relating to construction in progress for then-prospective construction within our retail segment and (iii) higher net interest expense of approximately \$0.5 million primarily due to the \$225 million Amended and Restated Term Loan Agreement

FFO increased \$4.3 million for the three months ended March 31, 2024 compared to the same period in 2023, primarily due to an increase in net settlement payments received during the first quarter of 2024, an increase in our office segment due to higher annualized base rents and an increase at Waikiki Beach Walk - Embassy Suites due to higher average occupancy and revenue per available room. These increases were offset by the non-recurring costs related to construction in progress written off in the first quarter and higher interest expense as described above.

FFO is a non-GAAP supplemental earnings measure which the company considers meaningful in measuring its operating performance. A reconciliation of net income to FFO is attached to this press release.

Use of Non-GAAP Information

Funds from Operations

The company calculates FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts ("NAREIT"). FFO represents net income (computed in accordance with GAAP), excluding gains (or losses) from sales of depreciable operating property, impairment losses, real estate related depreciation and amortization (excluding amortization of deferred financing costs) and after adjustments for unconsolidated partnerships and joint ventures.

FFO is a supplemental non-GAAP financial measure. Management uses FFO as a supplemental performance measure because it believes that FFO is beneficial to investors as a starting point in measuring the company's operational performance. Specifically, in excluding real estate related depreciation and amortization and gains and losses from property dispositions, which do not relate to or are not indicative of operating performance, FFO provides a performance measure that, when compared year-over-year, captures trends in occupancy rates, rental rates and operating costs. The company also believes that, as a widely recognized measure of the performance of REITs, FFO will be used by investors as a basis to compare the company's operating performance with that of other REITs. However, because FFO excludes depreciation and amortization and captures neither the changes in the value of the company's properties that result from use or market conditions nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of the company's properties, all of which have real economic effects and could materially impact the company's results from operations, the utility of FFO as a measure of the company's performance is limited. In addition, other equity REITs may not calculate FFO in accordance with the NAREIT definition as the company does, and, accordingly, the company's FFO may not be comparable to such other REITs' FFO. Accordingly, FFO should be considered only as a supplement to net income as a measure of the company's performance. FFO should not be used as a measure of the company's liquidity, nor is it indicative of funds available to fund the company's cash needs, including the company's ability to pay dividends or service indebtedness. FFO also should not be used as a supplement to or substitute for cash flow from operating activities computed in accordance with GAAP.

Cash Net Operating Income

The company uses NOI internally to evaluate and compare the operating performance of the company's properties. The company believes cash NOI provides useful information to investors regarding the company's financial condition and results of operations because it reflects only those income and expense items that are incurred at the property level, and when compared across periods, can be used to determine trends in earnings of the company's properties as this measure is not affected by (1) the non-cash revenue and expense recognition items, (2) the cost of funds of the property owner, (3) the impact of depreciation and amortization expenses as well as gains or losses from the sale of operating real estate assets that are included in net income computed in accordance with GAAP or (4) general and administrative expenses and other gains and losses that are specific to the property owner. The company believes the exclusion of these items from net income is useful because the resulting measure captures the actual revenue generated and actual expenses incurred in operating the company's properties as well as trends in occupancy rates, rental rates and operating costs. Cash NOI is a measure of the operating performance of the company's properties but does not measure the company's performance as a whole. Cash NOI is therefore not a substitute for net income as computed in accordance with GAAP.

Cash NOI is a non-GAAP financial measure of performance. The company defines cash NOI as operating revenues (rental income, tenant reimbursements, lease termination fees, ground lease rental income and other property income) less property and related expenses (property expenses, ground lease expense, property marketing costs, real estate taxes and insurance), adjusted for non-cash revenue and operating expense items such as straight-line rent, amortization of lease intangibles, amortization of lease incentives and other adjustments. Cash NOI also excludes general and administrative expenses, depreciation and amortization, interest expense, other nonproperty income and losses, acquisition-related expense, gains and losses from property dispositions, extraordinary items, tenant improvements, and leasing commissions. Other REITs may use different methodologies for calculating cash NOI, and accordingly, the company's cash NOI may not be comparable to the cash NOIs of other REITs.

While forward-looking statements reflect the company's good faith beliefs, assumptions and expectations, they are not guarantees of future performance. For a further discussion of these and other factors that could cause the company's future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in the company's most recent annual report on Form 10-K, and other risks described in documents subsequently filed by the company from time to time with the Securities and Exchange Commission. SUMMARY OF DEVELOPMENT OPPORTUNITIES

Our portfolio has numerous potential opportunities to create future shareholder value. These opportunities could be subject to government approvals, lender consents, tenant consents, market conditions, availability of debt and/or equity financing, etc. Many of these opportunities are in their preliminary stages and may not ultimately come to fruition. This schedule will update as we modify various assumptions and markets conditions change. Square footages and units set forth below are estimates only and ultimately may differ materially from actual square footages and units.

Notes:

- (1) The estimated stabilized yield is calculated based on total estimated project costs, as defined above, when the project has reached stabilized occupancy.
- (2) Based on management's estimation of stabilized occupancy (90%).
- (3) Project costs exclude capitalized interest cost which is calculated in accordance with Accounting Standards Codification 835-20-50-1.
- (4) The Lloyd Portfolio was acquired in 2011, consisting of approximately 600,000 rentable square feet on more than 16 acres located in the Lloyd District of Portland, Oregon. The portion of the property that has been designated for additional development is expected to include a high density, transit oriented, mixed-use urban village, with the potential to be in excess of approximately three million square feet. The zoning for such development opportunity allows a 12:1 Floor Area Ratio with a 250 foot height limit and provides for retail, office and/or multifamily development. Additional development plans are in the early stages and will continue to progress as demand and economic conditions allow.

Notes:

- The net rentable square feet for each of our retail properties and the retail portion of our mixed-use property is the sum of (1) the square footages of existing leases, plus (2) for available space, the field-verified square footage. The net rentable square feet for each of our office properties is the sum of (1) the square footages of existing leases, plus (2) for available space, management's estimate of net rentable square feet based, in part, on past leases. The net rentable square feet included in such office leases is generally determined consistently with the Building Owners and Managers Association, 2010 measurement guidelines. Net rentable square footage may be adjusted from the prior periods to reflect re-measurement of leased space at the properties.
- Percentage leased for each of our retail and office properties and the retail portion of the mixed-use property includes square footage under leases as of March 31, 2024, including leases which may not have commenced as of March 31, 2024. Percentage leased for our multifamily properties includes total units rented and occupied as of March 31, 2024.
- Annualized base rent is calculated by multiplying base rental payments (defined as cash base rents (before abatements)) under commenced leases for the month ended March 31, 2024 by 12. In the case of triple net or modified gross leases, annualized base rent does not include tenant reimbursements for real estate taxes, insurance, common area or other operating expenses. The foregoing notwithstanding:
 - The annualized base rent for La Jolla Commons has been adjusted for this presentation to reflect that the contractual triple net leases were instead structured as modified gross leases, by adding the contractual annualized triple net base rent of \$35,688,370 to our estimate of annual triple net operating expenses of \$10,672,726 for an estimated annualized base rent on a modified gross lease basis of \$46,361,096 for La Jolla Commons.
 - The annualized base rent for Eastgate Office Park has been adjusted for this presentation to reflect that the contractual triple net leases were instead structured as modified gross leases, by adding the contractual annualized triple net base rent of \$4,692,807 to our estimate of annual triple net operating expenses of \$1,989,495 for an estimated annualized base rent on a modified gross lease basis of \$6,682,302 for Eastgate Office Park.

Notes:

- (1) Percentage leased for mixed-use property includes square footage under leases as of March 31, 2024, including leases which may not have commenced as of March 31, 2024.
- (2) Annualized base rent is calculated by multiplying base rental payments (defined as cash base rents (before abatements)) for the month ended March 31, 2024 by 12. In the case of triple net or modified gross leases, annualized base rent does not include tenant reimbursements for real estate taxes, insurance, common area or other operating expenses.
- (3) Annualized base rent per leased square foot is calculated by dividing annualized base rent, by square footage under lease as of March 31, 2024.
- (4) Average occupancy represents the percentage of available units that were sold during the three months ended March 31, 2024, and is calculated by dividing the number of units sold by the product of the total number of units and the total number of days in the period. Average daily rate represents the average rate paid for the units sold and is calculated by dividing the total room revenue (i.e., excluding food and beverage revenues or other hotel operations revenues such as telephone, parking and other guest services) for each respective quarter period by the number of units sold. Revenue per available room, or RevPAR, represents the total unit revenue per total available units for each respective quarter period and is calculated by multiplying average occupancy by the average daily rate. RevPAR does not include food and beverage revenues or other hotel operations revenues such as telephone, parking and other guest services.

Notes:

- (1) Annualized base rent per leased square foot is calculated by dividing (i) annualized base rent for leases expiring during the applicable period, by (ii) square footage under such expiring leases. Annualized base rent is calculated by multiplying (i) base rental payments (defined as cash base rents (before abatements)) for the month ended March 31, 2024 for the leases expiring during the applicable period by (ii) 12 months.
- (2) Individual items may not add up to total due to rounding.

APPENDIX

Earnings Before Interest, Taxes, Depreciation, and Amortization (EBITDA): EBITDA is a non-GAAP measure that means net income or loss plus depreciation and amortization, net interest expense, income taxes, gain or loss on sale of real estate and impairments of real estate, if any. EBITDA is presented because it approximates a key performance measure in our debt covenants, but it should not be considered an alternative measure of operating results or cash flow from operations as determined in accordance with GAAP. The reconciliation of net income to EBITDA for the three months ended March 31, 2024 and 2023 is as follows:

	Three Months Ended March 31,	
	2024	2023
Net income	\$ 24,623	\$ 20,666
Depreciation and amortization	30,217	29,901
Interest expense, net	16,255	15,729
Interest income	(589)	(434)
Income tax expense	260	270
EBITDA	<u>\$ 70,766</u>	<u>\$ 66,132</u>

Adjusted EBITDA: Adjusted EBITDA is a non-GAAP measure that begins with EBITDA and includes adjustments for certain items that we believe are not representative of ongoing operating performance. Specifically, we include an early extinguishment of debt adjustment and pro forma adjustment to reflect a full period of NOI on the operating properties we acquire during the quarter, to assume all transactions occurred at the beginning of the quarter. We use Adjusted EBITDA as a supplemental performance measure because we believe these items create significant earnings volatility which in turn results in less comparability between reporting periods and less predictability regarding future earnings potential.

	Three Months Ended March 31,	
	2024	2023
EBITDA	\$ 70,766	\$ 66,132
Pro forma adjustments	—	—
Adjusted EBITDA	<u>\$ 70,766</u>	<u>\$ 66,132</u>

Earnings Before Interest, Taxes, Depreciation, and Amortization for Real Estate (EBITDA_{re}): EBITDA_{re} is a supplemental non-GAAP measure of real estate companies' operating performances. The National Association of Real Estate Investment Trusts (NAREIT) defines EBITDA_{re} as follows: net income or loss, computed in accordance with GAAP plus depreciation and amortization, net interest expense, income taxes, gain or loss on sale of real estate including gain or loss on change of control, impairments of real estate, and adjustments to reflect the entity's share of EBITDA_{re} of unconsolidated affiliates, if any. EBITDA_{re} is presented because it approximates a key performance measure in our debt covenants, but it should not be considered an alternative measure of operating results or cash flow from operations as determined in accordance with GAAP. The reconciliation of net income to EBITDA_{re} for the three months ended March 31, 2024 and 2023 is as follows:

	Three Months Ended March 31,	
	2024	2023
Net income	\$ 24,623	\$ 20,666
Depreciation and amortization	30,217	29,901
Interest expense, net	16,255	15,729
Interest income	(589)	(434)
Income tax expense	260	270
EBITDA _{re}	<u>\$ 70,766</u>	<u>\$ 66,132</u>

Funds From Operations (FFO): FFO is a supplemental measure of real estate companies' operating performances. NAREIT defines FFO as follows: net income, computed in accordance with GAAP plus depreciation and amortization of real estate assets and excluding extraordinary items, gains and losses on sale of real estate and impairment losses. NAREIT developed FFO as a relative measure of performance and liquidity of an equity REIT in order to recognize that the value of income-producing real estate historically has not depreciated on the basis determined under GAAP. However, FFO does not represent cash flows from operating activities in accordance with GAAP (which, unlike FFO, generally reflects all cash effects of transactions and other events in the determination of net income); should not be considered an alternative to net income as an indication of our performance; and is not necessarily indicative of cash flow as a measure of liquidity or ability to pay dividends. We consider FFO a meaningful, additional measure of operating performance primarily because it excludes the assumption that the value of real estate assets diminishes predictably over time, and because industry analysts have accepted it as a performance measure. Comparison of our presentation of FFO to similarly titled measures for other REITs may not necessarily be meaningful due to possible differences in the application of the NAREIT definition used by such REITs.

Funds Available for Distribution (FAD): FAD is a supplemental measure of our liquidity. We compute FAD by subtracting from FFO As Adjusted tenant improvements, leasing commissions and maintenance capital expenditures, eliminating the net effect of straight-line rents, amortization of above (below) market rents for acquisition properties, the effects of other lease intangibles, adding noncash amortization of deferred financing costs and debt fair value adjustments, adding noncash compensation expense, and adding (subtracting) unrealized losses (gains) on marketable securities. FAD provides an additional perspective on our ability to fund cash needs and make distributions by adjusting FFO for the impact of certain cash and noncash items, as well as adjusting FFO for recurring capital expenditures and leasing costs. However, other REITs may use different methodologies for calculating FAD and, accordingly, our FAD may not be comparable to other REITs.

Net Operating Income (NOI): We define NOI as operating revenues (rental income, tenant reimbursements, lease termination fees, ground lease rental income and other property income) less property and related expenses (property expenses, ground lease expense, property marketing costs, real estate taxes and insurance). NOI excludes general and administrative expenses, interest expense, depreciation and amortization, acquisition-related expense, other nonproperty income and losses, gains and losses from property dispositions, extraordinary items, tenant improvements and leasing commissions. Other REITs may use different methodologies for calculating NOI, and accordingly, our NOI may not be comparable to other REITs. Since NOI excludes general and administrative expenses, interest expense, depreciation and amortization, acquisition-related expenses, other nonproperty income and losses, gains and losses from property dispositions, and extraordinary items, it provides a performance measure that, when compared year over year, reflects the revenues and expenses directly associated with owning and operating commercial real estate and the impact to operations from trends in occupancy rates, rental rates, and operating costs, providing a perspective on operations not immediately apparent from net income. However, NOI should not be viewed as an alternative measure of our financial performance since it does not reflect general and administrative expenses, interest expense, depreciation and amortization costs, other nonproperty income and losses, the level of capital expenditures and leasing costs necessary to maintain the operating performance of the properties, or trends in development and construction activities which are significant economic costs and activities that could materially impact our results from operations.

Overall Portfolio: Includes all operating properties owned by us as of March 31, 2024.

Cash NOI: We define cash NOI as operating revenues (rental income, tenant reimbursements, lease termination fees, ground lease rental income and other property income) less property and related expenses (property expenses, ground lease expense, property marketing costs, real estate taxes and insurance), adjusted for non-cash revenue and operating expense items such as straight-line rent, amortization of lease intangibles, amortization of lease incentives and other adjustments. Cash NOI also excludes general and administrative expenses, depreciation and amortization, interest expense, other non-property income and losses, acquisition-related expense, gains and losses from property dispositions, extraordinary items, tenant improvements, and leasing commissions. Other REITs may use different methodologies for calculating cash NOI, and accordingly, our cash NOI may not be comparable to the cash NOIs of other REITs. We believe cash NOI provides useful information to investors regarding the company's financial condition and results of operations because it reflects only those income and expense items that are incurred at the property level, and when compared across periods, can be used to determine trends in earnings of the company's properties as this measure is not affected by (1) the non-cash revenue and expense recognition items, (2) the cost of funds of the property owner, (3) the impact of depreciation and amortization expenses as well as gains or losses from the sale of operating real estate assets that are included in net income computed in accordance with GAAP or (4) general and administrative expenses and other gains and losses that are specific to the property owner. We believe the exclusion of these items from net (loss) income is useful because the resulting measure captures the actual revenue generated and actual expenses incurred in operating the company's properties as well as trends in occupancy rates, rental rates and operating costs. Cash NOI is a measure of the operating performance of the company's properties but does not measure the company's performance as a whole. Cash NOI is therefore not a substitute for net income as computed in accordance with GAAP. A Reconciliation of Total Cash NOI to Operating Income is presented below:

Same-Store Cash NOI Comparison with Redevelopment: As noted below in the definition of Same-Store, Non-Same Store and Redevelopment Same-Store, information provided on a redevelopment same-store basis includes the results of properties undergoing significant redevelopment for the entirety or portion of both periods being compared. Redevelopment same-store is considered by management to be an important measure because it assists in eliminating disparities due to the redevelopment of properties during the particular period presented, and thus provides a more consistent performance measure for the comparison of the company's stabilized and redevelopment properties, as applicable. Additionally, redevelopment same-store is considered by management to be an important measure because it assists in evaluating the timing of the start and stabilization of our redevelopment opportunities and the impact that these redevelopments have in enhancing our operating performance. We present Same-Store Cash NOI Comparison with Redevelopment using cash NOI to evaluate and compare the operating performance of the company's properties, as defined above. A reconciliation of Same-Store Cash NOI Comparison with Redevelopment on a cash basis to operating income is presented below:

Incentives include amounts paid to tenants as an inducement to sign a lease that do not represent building improvements.
